Mesh Production

Metaloop Metal Systems uses only the best raw material, thoroughly inspected, to produce knitted mesh.

This comprehensive quality assurance and safety process guarantees competitive value and product liability.

Process and Team

Metaloop Metal Systems, together with its team of façade experts, offers complete services for design and engineering by applying advanced systems, materials, and installation methods, from conceptual facade design to complete on-site implementation, to meet the aesthetic and performance requirements of the projects.

Metaloop Building Systems offers design services and value engineering to architects, developers, and facade contractors focused on aesthetic, functional, and financial goals. Determining professional design, analytical BOQ, and performance characteristics as the basis of a successful construction process, our design professionals analyze project expectations and offer the best concept design solution. The procedure includes tender drawings, approvals, fabrication shopdrawings, fabrication, as built dimensions, and on-site facade assembly

Certification

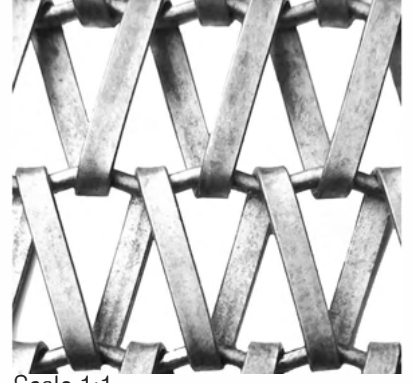

Metaloop, regardless of the size, type, or project's geographical location production, and assembly of multiple projects are carried out simultaneously in the same process since ISO 10002 and ISO 9001 Quality Management System has been guaranteed since 2015.
